streams2000

status

- The map illustrates water body status across various regions in Southern Sweden. The status is indicated by colored bars on the left side of the map:

 - High**: Blue bar, covering parts of Skåne, Scania, and Halland.
 - Good**: Green bar, covering parts of Skåne, Scania, and Halland.
 - Moderate**: Yellow bar, covering parts of Skåne, Scania, and Halland.
 - Poor**: Orange bar, covering parts of Skåne, Scania, and Halland.
 - Bad**: Red bar, covering parts of Skåne, Scania, and Halland.
 - Unknown**: Grey bar, covering parts of Skåne, Scania, and Halland.

Key locations labeled on the map include Malmö, Kävlinge, Kävle, Kungsbacka, Lyngørn, Mark, Mäsen, Varberg, Falken, and E20.

The map illustrates stream status across various locations in southern Sweden. The legend indicates the following status levels:

- High**: Represented by a blue line, found in the northern part of the map, including areas like Göteborg, Alingsås, and Malmö.
- Good**: Represented by a green line, found in the central and southern parts, including areas like Lund, Helsingborg, and Malmö.
- Moderate**: Represented by a yellow line, found in the southern coastal areas, including Västervik, Kristianstad, and Ystad.
- Poor**: Represented by an orange line, found in the eastern and southern parts, including Borås, Falkenberg, and Jönköping.
- Bad**: Represented by a red line, found in the southeastern coastal area, including Malmö and Lund.
- Unknown**: Represented by a grey line, found in the western coastal areas, including Göteborg and Helsingborg.
